ORIGINAL KICKSTARTER PRINT

Ramp Spiral #2

This photo was taken with a GoPro Hero 3+ Black Edition camera on a DJI Phantom Quadcopter flown by Tony Koop on January 18th, 2014 at 4:14pm. Having been inspired by the first ramp I shot in Minnepolis, I attempted to shoot this ramp at the Science Museum of Minnesota in downtown Saint Paul. The SMM employs 600 full and part time employees and provides science education to more than one million people per year.
