ORIGINAL KICKSTARTER PRINT

Downtown Minneapolis #2

This photo was taken with a GoPro Hero 3+ Black Edition camera on a DJI Phantom Quadcopter flown by Tony Koop on January 17th, 2014 at 6:14pm. It was the night before the Metrodome fell to make way for the new stadium. Damn it was cold. The atmosphere was crystal clear and frigid at 6°F as shown on the TCF Tower just to the right of the Foshay. Three minutes later I shot Ramp Spiral #1.
